

Friends share snacks, not pills.

FRIENDS FOR LIFE

PREVENT OVERDOSE

Illicit (illegal) fentanyl is a street drug that can cause overdose or death. It's showing up in fake pills that look like real prescription OxyContin, Adderall, Percocet, and Xanax.

You can't tell by looking whether a pill has fentanyl in it.

Only take medicine that has been prescribed to you, and don't share it with friends.

Because friends help keep one another safe.

Everyone deserves to live,
and anyone can be a friend for life.

**Your
friends
care what
you think.**

Use your influence to encourage your friends to:

- **Try out for a sports team**
- **Apply for an after-school job**
- **Do what makes them feel healthy and happy**

Speak up if you see them being pressured to try fake prescription pills or other drugs. Because friends look out for one another.

Everyone deserves to live,
and anyone can be a friend for life.

cortex.**

FRIENDS FOR LIFE

PREVENT OVERDOSE

**It helps you make safe choices,
and it's still growing.**

**That can make it hard to decide
if something is risky or not.**

**The fact is taking pills that
aren't prescribed to you is
never safe.**

Illicit fentanyl is a street drug that can cause overdose or death. It's showing up in fake pills that look like real prescription OxyContin, Adderall, Percocet, and Xanax. The risk to your brain and body just isn't worth it.

Everyone deserves to live,
and anyone can be a friend for life.
